Ener-G-Plus Extruded Equine Pellets

Extruded pellet is designed to provide an energy dense feed for performance horses in competition, training, conditioning, showing and breeding.

The Benefits of Ener-G-Plus Equine Pellet

- Improves digestion in the small intestine to over 90%-releasing essential Amino Acids so they are available for bone and muscle development.
- Energy increases by up to 40%.
- Fixed formulas reduce the chance of a digestive upset.
- Guaranteed L-Lysine level provides essential Amino Acid for protein utilization.
- Guaranteed levels of Vitamin E.
- Contains Chelated trace minerals to improve mineral utilization for sound bone development, improved hoof, hair and reproduction in mares. Increased stress resistance.
- Yeast cultures are digestive enzymes that aid in nutrient digestion.
- Extrusion promotes digestion and inhibits fermentation, reducing restless and fidgety behavior.

Feeding Directions:

- As a starting guideline, feed 4-8lbs per day along with 12-15lbs of a good quality hay or pasture per day. Adjust the amount of feed per day to maintain the desired body condition and energy levels. Additionally provide free access to salt and water.
