

EQUIBILITY®

INCORPORATING

TECHNOLOGY®

LOW STARCH - EASY TO USE PELLET

- Formulated for the Maintenance of the Active Mature Equine
- Utilizes the Latest Scientific Innovations
- Nutrient Dense, High Fiber and Fat Added

Edge Technology® based products are formulated using “super-fibers” which are digested as fiber in the caecum, but have the unique ability to provide readily accessible forms of digestible energy. Readily digestible fiber sources are complimented by the addition of vegetable oil, which is 2 ¼ times more energy dense than cereal grains.

Equibility is a fully fortified pelleted feed, formulated for the active, mature horse. Manufactured with sources of soluble fiber and vegetable oil, Equibility provides long lasting energy release and controlled performance. Diets with elevated grain levels may result in a horse that is difficult to handle. Equibility is calorie-dense but “non-heating”—perfect for horses that are difficult to handle or mentally too “high.”

Equibility is fortified with Stamm 30®, the mechanism for providing bioavailable sources of protein and critical micronutrients to the mature horse.

NUTRIENT ANALYSIS

Protein	12%
Digestible Energy	1275 kcal/lb
Fat	5%
Fiber	15%
Calcium	.8%
Phosphorus	.6%
Zinc	115 ppm
Copper	42 ppm
Vitamin A	5,000 IU/lb
Vitamin D	500 IU/lb
Vitamin E	50 IU/lb
Selenium	0.3 ppm

Feeding Instructions

Equibility is designed to be fed at 6-18 pounds per day depending on the horse’s size, body condition, stage of development or reproductive stage. When fed as directed, additional protein, vitamin or mineral supplements are unnecessary. Always provide clean, fresh water and high quality hay.
