Poize® is a premium quality textured sweet feed intended for mature horses experiencing light to medium levels of activity.

Wrapped in a light coat of molasses, the combination of top quality rolled and whole grains with an addition of highly digestible forms of fiber, like beet pulp and soy hulls, make Poize an extremely palatable and digestible product. In addition, Poize features the highest quality chopped North American Timothy and Alfalfa to enhance the nutritive package.

Poize is fortified with Stamm 30®, the industry’s most highly valued equine protein, vitamin and mineral supplement. Stamm 30 is the mechanism for providing bioavailable sources of critical micronutrients to the active, mature horse.

### Feeding Instructions

Poize is a highly fortified textured sweet feed. It is designed to be used as a base ration for horses and ponies experiencing light to medium work. Poize should be fed at ½ to 1 ½ pounds per 100 pounds of bodyweight per day or at a rate to maintain appropriate body condition depending on the size, stage of development or reproductive phase of the horse. Always provide clean, fresh water and high quality hay.
